PROFESSIONAL SUMMARY

Software Engineer with 3 years of experience designing and shipping scalable web applications using **React.js, TypeScript, Next.js, Node.js, and PostgreSQL**. Proficient in building modular frontend architectures, RESTful API integrations, real-time systems with WebSocket, and secure authentication flows with JWT. Hands-on experience with **Docker** for containerised deployments and practical exposure to **AWS and microservices** patterns. Comfortable working across the full stack and collaborating in cross-functional Agile teams to deliver production-ready applications.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Redux Toolkit, React Hooks, Tailwind CSS, HTML5, CSS3
Backend: Node.js, Express.js, REST APIs, GraphQL, WebSocket, JWT Authentication, Role-Based Access Control
Databases: PostgreSQL, Firebase Firestore, Firebase Realtime Database
Cloud & DevOps: Docker, AWS (Lambda – exposure), Vercel, CI/CD Pipelines, GitHub Actions
Languages: TypeScript, JavaScript (ES6+), Golang (exposure)
Tools: Git, GitHub, Postman, Jira, Agile / Scrum

PROFESSIONAL EXPERIENCE

Indic Arena Technology Pvt. Ltd. – Noida, India

Software Engineer

July 2023 – December 2025

- Built and maintained **10+ production React.js + TypeScript web applications** with reusable component libraries and Redux Toolkit state management, cutting new-feature delivery time by 40%.
- Engineered **data-heavy admin dashboards** with server-side filtering, pagination, real-time sync, and CSV export — handling tens of thousands of records and improving operational reporting efficiency significantly.
- Implemented end-to-end **JWT authentication and role-based access control (RBAC)** across Node.js and PostgreSQL backends, securing multi-role application workflows.
- Integrated **20+ RESTful APIs** with structured error handling, token refresh flows, and loading state management; introduced WebSocket connections for real-time data streaming.
- Improved frontend performance by **~35%** through code splitting, lazy loading, memoization, and optimised state management across Next.js and React.js projects.
- Collaborated on a **Golang-backed microservices project**; contributed to Docker containerisation workflows and CI/CD pipeline configuration for staging and production environments.

PROJECTS

NextRound AI • github.com/Prashant9155/next-round-ai

Tech Stack: React.js · TypeScript · Node.js · PostgreSQL · Docker · JWT · REST APIs · AWS

- Full-stack AI-powered interview preparation platform with AI mock interviews, resume analysis, progress dashboards, and personalised learning roadmaps.
- Architected scalable frontend with modular components and role-based workflows; integrated AI APIs with JWT-secured authentication and complex async state management.
- Containerised with Docker and configured for AWS deployment, enabling a production-ready, cloud-hosted architecture.

Cloud Deployment Management Platform • github.com/Prashant9155/deployment-control-panel

Tech Stack: React.js · TypeScript · Node.js · PostgreSQL · Docker · JWT · REST APIs · AWS

- Full-stack internal tool for client onboarding, domain configuration, container image management, and deployment lifecycle tracking with centralised dashboards.
- Built RESTful API layer in Node.js with role-based access control using JWT; integrated Docker and AWS services for end-to-end deployment workflows.

Elympiad – Quiz Administration Platform

Tech Stack: React.js · TypeScript · Redux Toolkit · Firebase · JWT · REST APIs

- Scalable quiz management system supporting contests, participants, live leaderboards, reporting, and real-time updates via WebSocket.
- Implemented Firebase Realtime Database for live sync and Redux Toolkit state architecture for complex quiz and scoring interactions; optimised rendering for high concurrency with virtual scrolling.

WildflowerLabs.earth

Tech Stack: Next.js · React.js · Tailwind CSS · CMS · REST APIs

- Delivered client MVP with Next.js SSR/SSG, headless CMS integration, interactive data charts, contact forms, and SEO-optimised responsive frontend architecture.

E D U C A T I O N

Master of Computer Applications (MCA) – Lakshmi Narain College of Technology – 2021 – 2023

Bachelor of Science – Mathematics – BRABU University – 2016 – 2019
